Swampscott Retirement Board
Town Hall
22 Monument Avenue
Swampscott, MA 01907

Dear Swampscott Retirement Board:

Stone Consulting, Inc. has performed a January 1, 2017 actuarial valuation of the Swampscott Retirement System. This valuation and report was prepared using generally accepted actuarial principles and practices.

To the best of our knowledge, this report is complete and accurate, and the assumptions used represent our best estimate of anticipated experience of the system except where noted in the text.

The funding objective of the plan is to fully fund the system while attempting to maintain a stable contribution amount for the upcoming fiscal year that is consistent with prior funding schedules or if employer finances allow it, to increase the contribution amount. This funding objective is being met.

- The contribution amount for Fiscal Year 2019 is \$5,395,166, which is \$2,111 greater than the anticipated contribution amount from the prior funding schedule.
- The length of the funding schedule contained in this actuarial valuation report is thirteen years (fully funded in Fiscal Year 2031).
- The amortization of the unfunded liability increases by 2.90% each year.
- We anticipate over time the contribution level to decrease as a percentage of payroll.

PERAC and GASB guidelines indicate that actuarial valuations should be conducted at least every other year. The Swampscott Retirement Board conducted their previous actuarial valuation effective January 1, 2015.

Stone Consulting, Inc. is completely independent of the Town of Swampscott. This includes any of its officers and key personnel. Neither we or anyone else closely associated with us has any relationship with the Town of Swampscott that would impair our independence, other than this or related assignments.

We are pleased to present the results of this valuation. If the Retirement Board has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in inaccurate or misleading understanding of the results. The use of these results may not be appropriate for all circumstances.

I, Lawrence Stone, am a consultant for Stone Consulting, Inc. I am a member of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,
STONE CONSULTING, INC.

Introduction

This report presents the results of the actuarial valuation of the Swampscott Retirement System. The valuation was performed at the request of the Retirement Board as of January 1, 2017 for the purpose of determining the contribution requirements for Fiscal Year 2019 and beyond. The contribution requirements are based on:

- The financial condition of the system as of December 31, 2016;
- The benefit provisions of M.G.L. Chapter 32 and related statutes;
- The demographics of members in the system (i.e., active and inactive participants, retirees and beneficiaries as of January 1, 2017);
- Economic assumptions regarding salary increases and investment earnings; and
- Other actuarial assumptions (e.g., withdrawals, retirement, death, etc.)

Valuation Summary

	January 1, 2017 Valuation	January 1, 2015 Valuation	Change
Contribution Fiscal 2019	\$5,395,166	\$5,393,055	\$2,111 increase
Funding Schedule Length (as of Fiscal 2019)	13 years	13 years	same
Amortization Increase	2.90%	4.00%	1.10% decrease
Funding Ratio	53%	48%	+5%
Interest Rate Assumption	7.50%	8.00%	-0.50%

Summary of Funding Schedule and Funding Progress

- The funding level of the Swampscott Retirement System is 53% compared to 48% for the January 1, 2015 actuarial valuation. The funding level is estimated to be near the median for Massachusetts' Contributory Retirement Systems.
- The schedule length is thirteen (13) years, a length consistent with the 13 years remaining from the 15-year schedule from the January 1, 2015 valuation. The maximum period allowed is twenty-two years (Fiscal 2040).
- The portion of the contribution which amortizes the unfunded liability increases by 2.90% each year.
- The Fiscal Year 2019 contribution is \$2,111 greater than the planned 2019 contribution.
 - The planned Fiscal 2019 contribution would have been higher but in Fiscal 2018 the Early Retirement Incentives are being paid off earlier than scheduled

Summary of Changes to Assumptions, Methodology, and Plan Provisions

- The discount rate assumption is 7.50%
 - 8.00% in prior valuation
 - Decrease in discount rate increased the unfunded actuarial accrued liability by \$4.6 million
 - Reflects anticipated future market performance

- The salary increase assumption is based on a select and ultimate table
 - 3.75% ultimate rate for all employees, plus the following step increases:

Yrs. of Service	1	2	3	4	5
Groups 1 & 2	4.25%	3.75%	1.25%	1.25%	3.75%
Police	4.25%	9.25%	4.25%	9.25%	-
Fire	5.25%	5.25%	3.25%	-	-

- This assumption has been maintained from the prior valuation.
- The mortality assumption is based upon the RP-2014 table adjusted to the year 2006, generationally projected with MP-2016
 - Previous valuation used the RP-2000 table projected from the year 2000 with Generational Mortality, Scale BB.
 - Net effect of this change decreased the unfunded actuarial accrued liability by \$275 thousand.

Summary of Experience

- Annual return in Calendar 2016 - 3.3% vs. a 7.50% assumption.
 - \$4,228,334 net actuarial loss in Calendar years 2015 and 2016.
- The System's asset portfolio effective December 31, 2016 is approximately 79% equities and 21% fixed income and short-term investments.
- Total compensation increased by 6.6% over the prior valuation (two-year period)
 - Average annual compensation (compensation divided by number of active members) increased by 8.4% over two years, or 4.1% per year.
 - Salary gain of \$1.7 million (less liability than expected when compared to salary projected from the prior valuation data with the prior assumption)

January 1, 2017 Actuarial Valuation Results

e. Unfunded Actuarial Accrued Liability as of July 1, 2018	\$44,951,162	\$47,183,476	

*Excluding State reimbursed COLA

NOTE: for all tables in this report, totals may not sum due to rounding.

Development of Funding Schedule

The appropriation for Fiscal 2019 is as follows:

Net Employer Normal Cost for Fiscal 2019 (including admin. expenses)	\$ 893,198
Net 3(8)(c) Payments	66,317
Amortization of unfunded liability	<u>4,435,651</u>
Total Appropriation required for Fiscal 2019	\$ 5,395,166

- The funding schedule is presented on the following page. The schedule's length is thirteen (13) years which is equal to the remainder of the 15-year schedule from the January 1, 2015 valuation.
- The maximum funding schedule length allowed by Section 22F of Chapter 32 of the Massachusetts General Laws is twenty-two years to Fiscal 2040.
- The portion of the contribution which amortizes the unfunded liability increases by 2.90% each year.
- The contribution is assumed to be made at the beginning of the fiscal year.
- The funding schedule does not include the effect of the unrecognized net losses of \$2,048,852, shown on page 12.

The funding contribution is composed of three components:

- Net Normal Cost, including administrative expense
- Amortization of the Unfunded Liability
- Net 3(8)(c) payments

These three components are discussed in greater detail in the pages following the funding schedule.

SWAMPSCOTT CONTRIBUTORY RETIREMENT SYSTEM

FUNDING SCHEDULE

Fiscal Year	Normal Cost	Unfunded Liability	Funding Amortization of UAAL	Net 3(8)(c) Payments	Schedule Contribution
2019	893,198	44,951,162	4,435,651	66,317	5,395,166
2020	926,693	43,554,175	4,564,285	66,317	5,557,295
2021	961,444	41,914,131	4,696,649	66,317	5,724,410
2022	997,498	40,008,793	4,832,852	66,317	5,896,667
2023	1,034,904	37,814,137	4,973,005	66,317	6,074,226
2024	1,073,713	35,304,217	5,117,222	66,317	6,257,252
2025	1,113,977	32,451,019	5,265,621	66,317	6,445,916
2026	1,155,752	29,224,303	5,418,324	66,317	6,640,393
2027	1,199,092	25,591,426	5,575,456	66,317	6,840,865
2028	1,244,058	21,517,168	5,737,144	66,317	7,047,519
2029	1,290,710	16,963,526	5,903,521	66,317	7,260,549
2030	1,339,112	11,889,505	6,074,723	66,317	7,480,152
2031	1,389,329	6,250,890	6,250,890	66,317	7,706,536
2032	1,441,429	-	-	66,317	1,507,745

Amortization of Unfunded Liability as of July 1, 2018

Year	Type	Original Amort. Amount	Percentage Increasing	Original # of Years	Current Amort. Amount	Years Remaining
2019	Fresh Start	4,435,651	2.90%	13	4,435,651	13

Notes on Amortization of Unfunded Liability

Year is the year the amortization base was established. **Type** is the reason for the creation of the base. **Original Amortization Amount** is the annual amortization amount when the base was established. **Percentage Increasing** is the percentage that the Original Amortization Amount increases per year. **Original # of Years** is the number of years over which the base is being amortized. **Current Amortization Amount** is the amortization payment amount for this year. **Years Remaining** is the number of years left to amortize the base.

* Does not include the effect of the unrecognized net losses of \$2,048,852

Components of the Funding Schedule

The components of the funding contribution are developed from the results on page 6 as follows:

Net Normal Cost and Administrative Expense

	January 1, 2017	% of Payroll*
Gross Normal Cost (GNC)	\$ 1,856,557	14.2%
Employees Contribution	<u>1,194,323</u>	9.1%
Net Normal Cost (NNC)	\$ 662,234	5.1%
Adjusted to Beginning of Fiscal Year 2019	37,598	
Administrative Expense	<u>193,366</u>	1.5%
Adjusted Net Normal Cost With Admin. Expense	\$ 893,198	

- The gross normal cost (GNC) is the “price” of benefits accruing in the current year if the valuation assumptions are realized. For an individual, this is the value in benefits which they are earning with their current year of service.
- The GNC only relates to current actives; retirees have finished earning their benefits and inactives are not earning any credited service.
- The GNC for the whole system is split into two parts: the portion which is paid for by the employees (Employee Contributions), and the portion which must be paid for by the Retirement System (Net Normal Cost, or NNC).
- The NNC is adjusted from January 1, 2017 to Fiscal 2019 by rolling it forward with a salary increase factor of 3.75%.
- Finally, administrative expense is added to the adjusted NNC. This is the amount seen in the funding schedule.

*Payroll paid in 2016 for employees as of January 1, 2017 is \$13,083,316. Payroll for new hires in 2016 was annualized.

Unfunded Actuarial Accrued Liability

		January 1, 2017	Percentage Change
Active Actuarial Accrued Liability		\$ 44,010,494	17.4%
Superannuation	\$ 40,545,465		
Death	\$ 859,896		
Disability	\$ 2,330,502		
Withdrawal	\$ 274,631		
Retiree, Inactive, Survivor and Beneficiary Actuarial Accrued Liability		\$ 51,304,850	1.3%
Retirees and Beneficiaries	\$ 41,500,959		
Disabled	\$ 9,204,574		
Inactive	\$ 599,317		
Total Actuarial Accrued Liability (AAL)		\$ 95,315,344	8.1%
Actuarial Value of Assets (AVA)		\$ 50,954,804	19.9%
Unfunded Actuarial Accrued Liability		\$ 44,360,540	-2.8%
Funded Ratio (AVA / AAL)			
2017 (7.50% interest rate):		53%	
2015 (8.00% interest rate):		48%	

- Actuarial Accrued Liability (AAL) is the “price” of benefits attributable to benefits earned in past years, or in other words, represents today’s value of all benefits earned by active and inactive members.
- The total AAL is \$95,315,344. This along with an actuarial value of assets of \$50,954,804 produces a funded status of 53%. This compares to a funded status of 48% for the 2015 valuation.
- The Unfunded AAL is the portion of the AAL which is not covered by the actuarial value of assets. The UAAL for Swampscott as of January 1, 2017 is \$44,360,540. This is adjusted to July 1, 2018 to produce the Unfunded Liability seen in Fiscal Year 2019 in the funding schedule.
- In developing the funding schedule, we used a fresh start approach in which the unfunded actuarial accrued liability (UAAL), other than the UAAL due to past early retirement incentives, is reamortized instead of maintaining the existing amortization amount and separately amortizing the actuarial gain or loss. This often results in a funding schedule in which the changes in contribution amounts from year to year are more consistent.

Net 3(8)(c) Payments

- 3(8)(c) payments are benefits which the Swampscott Retirement System pays to or receives from other retirement boards for service that a retiree had with a different retirement system.
- The net 3(8)(c) payments are the difference between what the Swampscott Retirement System paid out minus what was received by the System, calculated based on the December 31, 2016 PERAC annual statement.
- The amount of net 3(8)(c) payments is assumed to remain level in future years.

Assets

	Cash	\$	341,478.84
	Short Term Investments		2,335,761.51
	Pooled Domestic Equity Funds		7,326,719.03
	Pooled Alternative Investments		273,663.94
	Pooled Real Estate Funds		181,734.00
	PRIT FUND		<u>38,455,772.34</u>
A	Sub-Total:	\$	48,915,129.66
	Interest Due and Accrued		1,609.05
	Accounts Receivable		1,505.10
	Accounts Payable		<u>(12,291.99)</u>
B	Sub-Total:	\$	(9,177.84)
	Market Value of Assets [(A) + (B)]	\$	48,905,951.82

- The asset allocation is approximately 21% fixed income, cash, receivables and payables and 79% equities, alternative investments, hedge funds and similar types of investments.

Five-Year Asset Smoothing

1. Market value of assets including receivable/payable as of 01/01/2017 \$ 48,905,952

2. Phase-in of asset gains and losses

	Plan Year (1)	Original Amount (2)	Percent Unrecognized (3)	Amount Unrecognized (2) x (3)
a.	2016	(\$1,076,070)	80%	(\$860,856)
b.	2015	(\$3,152,265)	60%	(\$1,891,359)
c.	2014	\$331,431	40%	\$132,573
d.	2013	\$2,853,951	20%	\$570,790
e.	2012	\$1,621,329	0%	\$0
f.	2011	(\$3,292,249)	0%	\$0
g.	Total	\$2,199,706		(\$2,048,852)

3. Valuation assets without corridor as of 01/01/2017 \$ 50,954,804
(1. - 2.g.)

4. Corridor Check

a. 90% of Market Value \$ 44,015,357
b. 110% of Market Value \$ 53,796,547

5. Valuation assets with corridor as of 01/01/2017 \$ 50,954,804
(3. within Corridor)

6. Calculation of return on valuation assets

a. Valuation assets as of 01/01/2016 \$ 42,498,707
b. ER contribs + EE contribs - Ben Pymts - Expenses \$ 1,406,907
c. Actual return on valuation assets \$ 7,049,190
5. - (6.a. + 6.b.)
d. Weighted value of valuation assets \$ 43,202,160
e. Return on valuation assets 16.3%
(6.c. / 6.d.)
f. Annualized return on assets 7.9%

APPENDICES

Appendix A – Actuarial Methods and Assumptions

ACTUARIAL METHODS

Actuarial Cost Method

The Entry Age Normal Actuarial Cost Method has been used in this valuation. Under this method, the normal cost is the amount calculated as the level percentage of compensation necessary to fully fund the prospective benefits from each member's entry age to retirement age.

The actuarial accrued liability represents the theoretical accumulation of all prior years' normal costs for the plan members as if the program had always been in effect. The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over plan assets.

Fiscal Year Adjustment

The actuarial results are adjusted by the valuation interest rate and salary scale to the beginning of Fiscal Year 2019. The unfunded actuarial accrued liability is rolled forward with normal cost and further adjusted by anticipated contributions and interest.

ACTUARIAL ASSUMPTIONS

Valuation Date

January 1, 2017.

Investment Return

7.50% per year net of investment expenses. (8.00% in prior valuation).

Regular Interest Rate Credited to Annuity Savings Account

2% per year.

Cost-of-Living Increases

A 3% COLA on the first \$13,000 of a member's retirement allowance is assumed to be granted every year.

Salary Increases

Select and Ultimate assumption, based on years of credited service:

3.75% ultimate rate for all employees, plus the following steps:

Yrs. of Service	1	2	3	4	5
Groups 1 & 2	4.25%	3.75%	1.25%	1.25%	3.75%
Police	4.25%	9.25%	4.25%	9.25%	-
Fire	5.25%	5.25%	3.25%	-	-

Step increases are assumed to be part of the salary increase assumption. The total payroll is assumed to increase at 3.75% per year.

Credited Service

All service is assumed to be due to employment with the municipality.

Family Composition

Members assumed married with 2 dependent children – one male and one female both age 15; age difference between member and spouse assumed to be 3 years (the male being the older).

Administrative Expenses

Estimated budgeted amount of \$193,366 for the Fiscal Year 2019 is added to the Normal Cost. The administrative expense does not include investment manager and custodial fees. These fees are considered part of the interest rate assumption that is net of fees.

Net 3(8)(c)

Net 3(8)(c) payments are assumed to be the same level as the past calendar year for all future years.

Contribution Timing

Contributions are assumed to be made at the beginning of the fiscal year.

Actuarial Methods and Assumptions (Continued)

Withdrawal Prior to Retirement

The rates shown at the following sample ages illustrate the withdrawal assumption. Withdrawal rates are set to zero if the retirement rate at that age is nonzero.

Rate of Withdrawal		
Service	Group 1 and 2	Group 4
0	15%	1.5%
1	12%	1.5%
2	10%	1.5%
3	9%	1.5%
4	8%	1.5%
5	7.6%	1.5%
10	5.4%	1.5%
15	3.3%	0.0%
20	2.0%	0.0%
25	1.0%	0.0%
30+	0.0%	0.0%

Disability Prior to Retirement

The rates shown at the following sample ages illustrate the assumption regarding the incidence of disability:

Rate of Disability		
Age	Group 1 and 2	Group 4
20	0.01%	0.10%
25	0.02%	0.20%
30	0.03%	0.30%
35	0.06%	0.30%
40	0.10%	0.30%
45	0.15%	1.00%
50	0.19%	1.25%
55	0.24%	1.20%
60	0.28%	0.85%

In-Service Disability and Death

Both Disability and In-Service Death are assumed to be 45% ordinary and 55% accidental for Group 1 and 2, and 10% ordinary and 90% accidental for Group 4.

Actuarial Methods and Assumptions (Continued)

Rates of Retirement

The rates shown at the following ages illustrate the assumption regarding the incidence of retirement, once the member has achieved 10 years of service:

Age	Group 1 & 2 Male	Group 1 & 2 Female	Group 4	Hired after 4/1/2012		
				Group 1 & 2 Male	Group 1 & 2 Female	Group 4
50	1%	1.5%	2%	0%	0%	0%
51	1%	1.5%	2%	0%	0%	0%
52	1%	2.0%	2%	0%	0%	0%
53	1%	2.5%	2%	0%	0%	0%
54	2%	2.5%	7.5%	0%	0%	0%
55	2%	5.5%	15%	0%	0%	10%
56	2.5%	6.5%	10%	0%	0%	7%
57	2.5%	6.5%	10%	0%	0%	20%
58	5%	6.5%	10%	0%	0%	10%
59	6.5%	6.5%	15%	0%	0%	15%
60	12%	5%	20%	25%	30%	20%
61	20%	13%	20%	20%	13%	20%

Mortality

RP-2014 table adjusted to the year 2006, generationally projected with MP-2016 (sex-distinct). (Prior valuation used RP-2000 table projected from the year 2000 with Generational Mortality, Scale BB). During employment the healthy employee mortality table is used. Post-employment the healthy annuitant table is used.

Mortality for disabled retirees follows the same table as non-disabled retirees, set forward 2 years. Death is assumed to be due to the same cause as the disability 40% of the time.

Appendix B – Summary of Principal Provisions

1. PARTICIPANT

Participation is mandatory for all full-time employees whose employment commences before age 65. There are three classes of members in the retirement system:

- Group 1: general employees
- Group 2: employees in specified hazardous occupations (e.g., electricians)
- Group 4: police and firefighters

2. MEMBER CONTRIBUTIONS

Member contributions vary depending upon date hired as follows:

Date of Hire	Member Contribution Rate
Prior to 1975	5% of Pay
1975 – 1983	7% of Pay
1984 – June 30, 1996	8% of Pay
After June 30, 1996	9% of Pay

Members hired after 1978 contribute an additional 2% of pay over \$30,000.

3. PAY

a. Pay

Gross regular compensation excluding bonuses, overtime, severance pay, unused sick pay, and other similar compensation.

b. Average Pay

The average of pay during the three consecutive years that produce the highest average or, if greater, during the last three years (whether or not consecutive) preceding retirement. For members hired after April 1, 2012, five-year averages will be used.

4. CREDITED SERVICE

Period during which an employee contributes to the retirement system plus certain periods of military service and “purchased” service.

Summary of Principal Provisions (Continued)

5. SERVICE RETIREMENT

a. Eligibility

Hired prior to April 2, 2012:

- Attainment of age 55 and completion of ten years of credited service; or
- Any age with completion of 20 years of service.
- Note, if hired prior to 1978 or a member of Group 4, completion of ten years of service is not required.

Hired after April 1, 2012:

- Group 1 – Age 60 and Completion of 10 years of credited service;
- Group 2 – Age 55 and completion of 10 years of service;
- Group 4 – Age 55.

b. Retirement Allowance

Determined as the product of the member's benefit percentage, average pay and credited service, where the benefit percentage is shown below (maximum allowance of 80% of average pay):

Benefit Percentage	Group 1	Group 2	Group 4
2.5%	65+	60+	55+
2.4	64	59	54
2.3	63	58	53
2.2	62	57	52
2.1	61	56	51
2.0	60	55	50
1.9	59	N/A	49
1.8	58	N/A	48
1.7	57	N/A	47
1.6	56	N/A	46
1.5	55	N/A	45
Hired after April 1, 2012*			
2.5%	67+	62+	57+
2.35	66	61	56
2.20	65	60	55
2.05	64	59	54
1.90	63	58	53
1.75	62	57	52
1.60	61	56	51
1.45	60	55	50

*Reduction is .125% for each year early instead of .15% per year for employees with over 30 years of service.

In addition, veterans receive an additional \$15 per year for each year of credited service up to 20 years

Summary of Principal Provisions (Continued)

6. DEFERRED VESTED RETIREMENT

a. Eligibility

Completion of 10 years of credited service (for elected and appointed members, 6 years in the event of involuntary termination).

b. Retirement Allowance

Determined in the same manner as "Service Retirement" section above with the member eligible to start collecting a benefit at age 55, (or age 57 for post-April 1, 2012 hires) or defer until later at his or her discretion. If a member chooses, his or her contributions with interest may be withdrawn. The amount of interest he or she will receive depends on length of service and whether or not the termination of employment was voluntary.

7. ORDINARY DISABILITY RETIREMENT

a. Eligibility

Non-job related disability after completion of 10 years of credited service.

b. Retirement Allowance

Determined in the same manner as "Service Retirement" section and calculated as if the member had attained age 55 (or age 57 for those hired after April 1, 2012), if younger. Veterans receive 50% of pay (during final year) plus an annuity based on accumulated member contributions with interest.

8. ACCIDENTAL DISABILITY RETIREMENT

a. Eligibility

Disabled as a result of an accident in the performance of duties. No age or service requirement.

b. Retirement Allowance

72% of pay plus an annuity based on accumulated member contributions with interest. Also, a dependent's allowance per year for each child. Total allowance not to exceed 100% of pay (75% for members hired after 1987).

Summary of Principal Provisions(Continued)

9. NON-OCCUPATIONAL DEATH

a. Eligibility

Dies while in active service, but not due to occupational injury. 2 years of service.

b. Retirement Allowance

Benefit as if Option C had been elected (see below) and member had attained age 55 (or age 57 for those hired after April 1, 2012) if younger.

Minimum monthly benefits provided as follows:

- spouse - \$500,
- first child - \$120,
- each additional child - \$90

10. OCCUPATIONAL DEATH

a. Eligibility

Dies as a result of an occupational injury.

b. Benefit Amount

72% of pay plus refund of annuity savings fund balance. In the case of an accidental disability retiree who dies of the same cause, the beneficiary receives 72% of the last 12 months salary or the current pension amount, whichever is greater.

11. COST-OF-LIVING INCREASES

An increase of up to 3% applied to the first \$13,000 of annual benefit. Funded by the Employer from Fiscal Year 1999. Percentage increase is voted on each year by the Retirement Board. Cost-of-living increases granted during Fiscal Year 1982 through Fiscal 1998 are reimbursed by the Commonwealth.

12. OPTIONAL FORMS OF PAYMENT

- Option A: Allowance payable monthly for the life of the member.
- Option B: Allowance payable monthly for the life of the member with a guarantee of remaining member contributions with interest.
- Option C: Allowance payable monthly for the life of the member with 66-2/3% continuing to the member's beneficiary upon the member's death. If the beneficiary predeceases the member, the allowance amount "pops up" to the non-reduced amount.

Appendix C – Charts of Selected Actuarial Statistics

History of Demographic Statistics

Valuation Year	Number	Average Age	Average Past Service	Average Ann'l Compensation
2017	246	50.1	13.7	\$53,184
2015	250	49.1	12.9	\$49,081
2013	235	49.6	13.5	\$47,602
2011	226	49.0	13.0	\$48,467
2010	241	48.6	12.1	\$44,595
2008	252	46.0	11.4	\$41,115
2006	282	45.0	9.6	\$35,500

- Employee age and service have increased by 5.1 years and 4.1 years, respectively. This pattern has appeared in the experience of several systems in the Commonwealth. Average annual compensation has grown by 49.8% (3.7% annually) over the past eleven years.

Appendix D – Glossary of Terms

- **Actuarial Accrued Liability**
The portion of the Present Value of Benefits that is attributable to past service.
- **Actuarial Assets**
Market value of assets, adjusted by payables and receivables.
- **Actuarial Assumptions**
Estimates are made as to the occurrence of certain events that determine the level of benefits to be paid and how long they will be provided. The more important actuarial assumptions include the investment return on assets, salary increases and the rates of turnover, disability, retirement and mortality.
- **Actuarial Cost Method**
The procedure that is used to allocate the present value of benefits between the liability that is attributable to past service (Actuarial Accrued Liability) and that attributable to future service.
- **GASB**
Government Accounting Standards Board (issues guidance for disclosure of retirement system liabilities).
- **Normal Cost**
The portion of the Present Value of Benefits that is attributable to benefits to be earned in the coming year.
- **PERAC**
Public Employee Retirement Administration Commission, a division of the State government which has regulatory authority over the administration of the retirement system.
- **Present Value of Benefits**
Represents the dollar value today of all benefits expected to be earned by current members if all actuarial assumptions are exactly realized.
- **PRIT**
Pension Reserves Investment Trust Fund is the state controlled and administered fund for the investment of assets for members of the retirement system.
- **Unfunded Actuarial Accrued Liability**
That portion of the Actuarial Accrued Liability not covered by System Assets.

Disclosures

- Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as:
 - plan experience differing from that anticipated by the economic or demographic assumptions,
 - changes in economic or demographic assumptions,
 - increases or decreases expected as part of natural operation of the methodology used for these measurements such as additional contribution requirements based on the plan's funded status,
 - changes in plan provisions or applicable law.

As part of the valuation, we have not performed an analysis of the potential range of future measurements.
- Stone Consulting, Inc. was furnished member data by the Swampscott Retirement System's administrative staff. Although examined under broad parameters for reasonableness, the data was not audited by the actuary. In addition, the administrative staff furnished financial statements that were not audited by the actuary or by the plan's auditors. With the assistance of the staff of the Swampscott Retirement Board, we were able to develop a database sufficient for valuation purposes.
- The investment return assumption is a long-term assumption and is based on capital market expectations by asset class, historical returns, and professional judgement.
- Historically, 10% to 11% has been the expected long-term rate of return for equities, and 6% to 7% has been the expected long-term rate of return for fixed income securities. Many economists and investment professionals are projecting lower returns of 7% to 8% for equities and 4% to 6% for fixed income securities. In light of these projections, as well as historical investment returns, the 7.50% interest rate assumption is within the reasonable assumption range. We encourage close monitoring for changes in investment performance against expectations.
- The salary increase assumption reflects prior experience including PERAC's 2002 local experience study, current expectations, and professional judgement.
- Stone Consulting, Inc. used the Entry Age Normal actuarial funding method in this actuarial valuation. The use of the Entry Age Normal actuarial funding method is consistent with the requirements of Chapter 32 of the Massachusetts General Laws.
- The UAAL and funded ratio are measures of the plan's funded status. These measures reflect the plan's position as of January 1, 2017. We believe these measures, by themselves, are not appropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations or assessing the need for or the amount of future contributions. However, we believe these measures, in conjunction with the plan's funding schedule, are appropriate for assessing the amount of future contributions.

■ Swampscott Retirement Board
Actuarial Valuation as of January 1, 2017

PERAC Information Disclosure

The most recent actuarial valuation of the System was prepared by Stone Consulting, Inc. as of January 1, 2017

The normal cost for employees on that date was:	\$1,194,323	9.1% of payroll
The normal cost for the employer was:	\$662,234	5.1% of payroll

The actuarial liability for active members was:	\$44,010,494
The actuarial liability for retired members was (includes inactives):	\$51,304,850
Total actuarial accrued liability:	\$95,315,344
System assets as of that date (\$48,905,951.82 Market Value):	\$50,954,804
Unfunded actuarial accrued liability:	\$44,360,540

The ratio of system's assets to total actuarial liability was:	53%
--	-----

As of that date the total covered employee payroll was:	\$13,083,316
---	--------------

The principal actuarial assumptions used in the valuation are as follows:

Investment Return:	7.50% per annum
Rate of Salary Increase:	Select and ultimate rate (3.75% ultimate rate)
